

DATA HUB ACCELERATOR

Strategy in hand. Build plan out.

One day with your data / IT leaders and SMEs to turn your prioritized data goals into a detailed, costed execution plan for the Microsoft Data Platform — the “Day Two” step of the data journey, where strategy becomes the actions, designs, and funding that deliver it.

PREREQUISITE · ARRIVE WITH PRIORITIES

Data Innovation Hub

Microsoft-hosted event exploring data scenarios and priorities.

This session builds on one of the above — a Data Day-like exercise is the prerequisite. “Day Two” is the second step of the journey, not literally the next day: we schedule it when your priorities are agreed and the right people can be in the room.

Data Strategy Day

ArchitectNow-hosted “Day One” session — vision, priorities, platform design.

Your internal exercise

An in-house effort that has already prioritized your key data goals.

1 day

Working session, on site or virtual

2nd

Step of the data journey, after strategy

6

Working blocks, goals to roadmap

6

Artifacts — designs, specs, and costs

WHAT YOU GET

Six artifacts, ready to execute.

01 Microsoft Data Platform Design

A finalized, detailed design — architecture, workspaces, CI/CD, security, and capacity at build-ready depth — including integration with your AI platform, and how Fabric or Databricks integrates with your existing environment.

03 Patterns, Operations, and Governance Specification

Monitoring, alerting, BC/DR, security, sensitivity and classification, and governance — aligned to roles and responsibilities.

05 Implementation Approach & Roadmap

The recommended build-out approach and a sequenced roadmap — more detailed than the Data Day roadmap — with your team's dependencies flagged.

02 Data Mapping & Data Flow Specification

The source → domain → asset → product journey for every prioritized analytics goal, captured as a working spec.

04 Platform Run-Cost Estimates

What the Microsoft Data Platform costs to run for your scope and volumes — sized from the day's volumetrics review.

06 Total Cost of Ownership & Funding

A TCO for the roadmap, and Microsoft funding arranged to execute it for qualified accounts.

HOW IT WORKS

Six blocks. Roughly 9 to 4, with a working lunch.

01 · MORNING

Analytics Goals

Review the key priorities for analytics — the BI and AI outcomes, top down — that the day plans against.

02 · LATE MORNING

Data Mapping

Map the detailed data source to data domain to data asset to data product journey each goal requires.

03 · MIDDAY

Scope & Volumetrics

Agree the data scope and data volumes involved in enabling the analytics, sizing the platform honestly.

04 · EARLY AFTERNOON

Accelerating Data Value with AI

Vision how AI accelerates data management, data engineering, and data insights — and how data platform knowledge integrates with AI agents.

05 · MID AFTERNOON

Patterns, Challenges, and Governance

Cleansing and integration challenges, ingestion cadence, delta-load readiness, monitoring, alerting, BC/DR, CI/CD, security, sensitivity and classification, and governance — by role.

06 · LATE AFTERNOON

Roadmap & Sizing

An AI-accelerated roadmap and effort-sizing exercise aligned to priorities, with team dependencies and funding path named.

WHY ARCHITECTNOW

● 4 Solutions Partner Designations

Data and AI · Digital and App Innovation · Infrastructure Azure · Support Services.

● Azure AI & Data MVPs on Staff

Engagements led by Microsoft-recognized practitioners. 15+ years on the stack.

● AI Apps on Azure Specialization

Held by less than 4% of partners. Production AI on Azure, verified by Microsoft.

● Microsoft Frontier Funding qualified accounts

Five times the funding is available now — we arrange Microsoft funding to execute your roadmap. Subject to Microsoft eligibility.

Turn agreed priorities into a funded build plan.

30-minute sponsor call to confirm your prerequisite and set the agenda.
