

DATA STRATEGY DAY

Data scattered everywhere. One blueprint out.

One day with your IT and/or business leaders to align on what data-driven means for your organization, which BI and AI outcomes come first, and the platform design that gets you there, anchored to Microsoft Fabric or Azure Databricks, top down from business decisions.

1 day

Working session, on site or virtual

5

Artifacts built in the room

12

Attendee cap, so it stays a decision

5

Working blocks, vision to act

WHAT YOU GET

Five artifacts, all aligned to you.

01 Data Maturity Assessment

Where you sit today, from patchwork to democratized analytics, and your BI and AI readiness.

03 Data Platform Design

A service architecture anchored to Fabric or Databricks, integrated with your environment.

05 High-Level Roadmap

Sequenced first moves to enable the designed platform for the prioritized goals.

02 Prioritized Analytics Assessment

The BI and AI outcomes that set the north star for the platform, tied to strategic objectives.

04 Governance Recommendations

Security, operations (CI/CD etc), and regulatory needs met so the platform stays trusted.

HOW IT WORKS

Five blocks. Roughly 9 to 4, with a working lunch.

01 · MORNING

Vision

What becoming data-driven means for you: analytics democratized safely, a self-service culture, and data that is both BI and AI ready. Current state and its hidden costs surface here.

02 · LATE MORNING

Prioritize

The BI and AI outcomes that support your strategic objectives, captured and ranked. The top outcomes become the north star the platform is built to serve.

03 · EARLY AFTERNOON

Design

A service architecture on Fabric or Databricks, fit to your environment. A data map traces source to domain to asset to product, capturing the critical few of each.

04 · MID AFTERNOON

Govern

The governance goals the platform must meet from day one: security, operations (CI/CD and support), and the regulatory needs your industry imposes.

05 · LATE AFTERNOON

Act

High-level next steps to enable the designed platform for the prioritized goals. The roadmap agreed in the room, with owners named.

WHY ARCHITECTNOW

● 4 Solutions Partner Designations

Data and AI · Digital and App Innovation · Infrastructure Azure · Support Services.

● Azure AI MVPs on staff

Engagements led by Microsoft-recognized practitioners. 15+ years on the stack.

● AI Apps on Azure Specialization

Held by less than 4% of partners. Production AI on Azure, verified by Microsoft.

● Microsoft frontier funding pathway · qualified accounts

Five times the funding is available now, so there has never been a better time to start. Subject to Microsoft eligibility.

Agree what data-driven means, and where to start.

30-minute sponsor call to set the agenda.
