

MICROSOFT FABRIC IMPLEMENTATION & GOVERNANCE

Microsoft Fabric, deployed like an **enterprise platform**, not a pilot.

Capacity, workspaces, security, and governance designed once and delivered with CI/CD and infrastructure-as-code. Every team onboards onto a governed platform instead of a sprawl of workspaces.

3-zone

Bronze, silver, gold medallion architecture

Progressive

Stage promotions through build, validation, and release tiers

Audit-ready

Domains, naming standards, compliance mapping

100%

Scripted stand-up: Terraform + fabric-cicd

WHAT YOU GET

Your Fabric platform, four deliverables deep.

01 Capacity & FinOps Design

F-SKU sizing, shared vs dedicated capacities, reserved vs pay-as-you-go, and transparent cost visibility for every team on the platform.

03 Security & Governance Model

Workspace roles, OneLake security, and Entra ID groups, with naming standards and audit mapped to your compliance requirements.

02 Workspace & Medallion Architecture

Workspace boundaries, Fabric domains, bronze/silver/gold zones, and lakehouse vs warehouse decisions made per workload, not by default.

04 CI/CD & Automated Stand-Up

Git integration and deployment pipelines promoting from dev through prod, with workspaces and entities scripted in Terraform and fabric-cicd.

HOW WE DELIVER

Design first. Deliver from code. Migrate onto the new standard.

01 · ASSESS & DESIGN

Blueprint locked

Estate inventory, capacity sizing, workspace topology, and the target architecture agreed before anything ships.

02 · DELIVER THE PLATFORM

Platform stood up

Workspaces, security, pipelines, and governance controls deployed from code into your tenant.

03 · MIGRATE & OPERATIONALIZE

Estate onboarded

Existing workloads moved onto the new design, FinOps reporting live, and the runbook handed to your team.

WHY ARCHITECTNOW

- **4 Solutions Partner Designations**

Data & AI · Digital & App Innovation · Infrastructure Azure · Support Services.

- **Azure AI MVP on staff**

Microsoft-recognized expertise with a direct line to the product teams shipping Fabric and Azure. Your architecture reflects where the platform is heading.

- **AI Apps on Azure Specialization**

Held by a small fraction of partners. Production AI on Azure, verified by Microsoft.

- **Microsoft funding pathway** · eligible engagements

Our Azure specialization lets us nominate qualifying engagements for Microsoft Azure investment funding, subject to Microsoft eligibility and approval.

Get Fabric governed before it sprawls.

30-minute architecture conversation. Bring your current estate.
