ArchitectNow

Migrate and Modernize Your Estate

About ArchitectNow

ArchitectNow, based in St. Louis, Missouri, delivers cutting-edge software solutions. We simplify complex tech challenges, drive innovation, and help businesses succeed with tailored solutions designed to meet unique needs.

OFFER OVERVIEW

ArchitectNow's Azure Migration Jumpstart is designed to help clients move from legacy systems to scalable, secure cloud infrastructure — setting the stage for modernization, operational efficiency, and AI-readiness..

Key Benefits

- **Improve Scalability and Performance**: Move to cloud native services to support future growth and improve workload responsiveness.

- **Reduce Technical Debt:** Eliminate aging infrastructure and legacy systems that limit agility and increase maintenance costs.

- **Enhance Security and Compliance**: Strengthen security posture with Defender for Cloud and meet regulatory standards in the cloud.

- **Accelerate Time To Value**: Deploy scalable infrastructure and services faster than traditional upgrade systems.

- **Enable AI Readiness:** Modernize your infrastructure to support AI-driven workloads and integrate advanced analytics, paving the way next-generation digital experiences.

What ArchitectNow Will Deliver

Our migration approach includes, but is not limited to the following tasks:

◈ Cloud Readiness Assessment

We'll conduct a thorough review of your current infrastructure, applications, data and dependencies to identify opportunities, risks, and the ideal migration strategy. This includes cost analysis and identification of quick wins.

◈ Migration Planning and Roadmap

ArchitectNow will create a clear, phased migration plan aligned with your business priorities and timeline. The roadmap will outline workload groupings, technical requirements, and go-live sequencing to ensure minimal disruption.

◈ Azure Workload Migration

We'll execute the hands-on migration of servers, applications, databases and data-workloads to Azure

including Windows Server, Linux, SQL Server, PostgreSQL, and containerized workloads via Azure Kubernetes Service. Our approach ensures secure, optimized cloud transitions.

◈ AVS & Defender Setup

For hybrid environments, we'll deploy Azure VMware Solution (AVS) to lift and shift VMware-based workloads. We'll also configure Microsoft Defender for Cloud to continuously monitor security posture, apply policies, and remediate risks.

◈ Post Migration Optimization

After migration, we fine-tune your environment for performance, cost, reliability and security. This includes implementing governance policies, monitoring tools, backup solutions, and preparing your team for ownership through documentation and knowledge transfer.

Why ArchitectNow?

ArchitectNow offers expert guidance and customized plans to meet your business goals. We provide impartial risk evaluations and mitigation strategies for IT decisions, ensuring informed choices for platforms, upgrades, or integrations. Our Professional Services enhance your organization's IT experiences, reduce risks, and optimize operations.

We are your committed partner for ongoing business success.
