

# Microsoft Purview & Data Governance

## About ArchitectNow

ArchitectNow, based in St. Louis, Missouri, delivers cutting-edge software solutions. We simplify complex tech challenges, drive innovation, and help businesses succeed with tailored solutions designed to meet unique needs.

## OFFER OVERVIEW

ArchitectNow helps organizations modernize their data governance strategy using Microsoft Purview — Microsoft's unified solution for discovering, classifying, securing, and managing data across hybrid environments. Our structured delivery approach gives your team the tools and insights needed to govern data effectively, meet compliance requirements, and enable data-driven innovation..

## Key Benefits

- ◆ **End to End Visibility:** Get a centralized map of all your data across on-prem, cloud, SaaS, & hybrid environments. Identify data silos and uncover hidden risk.
- ◆ **Automated Classification:** Use built in or custom classifiers to automatically detect sensitive data such as PII, financials, or health records. Save time and reduce human error while staying audit-ready.
- ◆ **Compliance-Ready Policies:** Create and enforce data access, retention, and protection policies aligned with frameworks like HIPAA, GDPR, and CCPA. Reduce regulatory risk and streamline audits.
- ◆ **Trusted Data Access:** Empower business users and analysts to discover, request, and use trusted data without opening-up security holes. Improve speed to insight without sacrificing control.
- ◆ **Foundation for AI & Analytics:** Establish governance needed to responsibly scale AI advanced analytics initiatives. Ensure right data is used the right way, securely & ethically,
- ◆ **Agent-Driven Security, Automation and Data Control:** Employ automated agents to enhance security while reducing alert fatigue ; Gain visibility and control over how data is used by other organizational AI agents, ensuring privacy, security, and compliance.

## What ArchitectNow Will Deliver

Our governance program includes, but is not limited to the following tasks:

### ◆ Readiness Assessment & Governance Strategy

We'll start with discovery workshops to understand your data sources, regulatory pressures, pain points, and goals. From there, we provide a tailored governance roadmap, including recommendations on how to prioritize your Purview rollout.

### •Microsoft Purview Setup & Configuration

We will set up and configure your Microsoft Purview environment, covering - the scanning and indexing of essential data sources like Azure resources, Microsoft 365, and SQL databases; defining roles and permissions and enabling the data catalog; deploying Purview's intelligent DLP and Insider Risk triage agents to automate alert triage, improve threat detection, and simplify compliance management.

### ◆ Data Classification & Policy Implementation

We'll help configure sensitivity labels, custom classifiers, and data loss prevention (DLP) policies. We'll also build policies to manage data access, lifecycle retention, and protection including Data Security Posture Management (DSPM) for AI to help monitor prompts, responses, and risky interactions in AI apps aligned with your regulatory needs.

### ◆ Training & Enablement for Long-Term Success

Our team will deliver live training and documentation to ensure your technical teams, data stewards, and business stakeholders can manage and expand your governance program. We'll also provide best practices to support scalability and future data initiatives.

## Why ArchitectNow?

**ArchitectNow** offers expert guidance and customized plans to meet your business goals. We provide impartial risk evaluations and mitigation strategies for IT decisions, ensuring informed choices for platforms, upgrades, or integrations. Our Professional Services enhance your organization's IT experiences, reduce risks, and optimize operations.
