

Unify Your Data Platform

About ArchitectNow

ArchitectNow, based in St. Louis, Missouri, delivers cutting-edge software solutions. We simplify complex tech challenges, drive innovation, and help businesses succeed with tailored solutions designed to meet unique needs.

OFFER OVERVIEW

ArchitectNow partners with organizations to unify their data sources, streamline governance, and empower secure, real-time analytics. Using Microsoft Fabric and Microsoft Purview, we help you move from siloed and untrusted data to a modern platform that supports scale, compliance, self-service BI, and AI readiness. Our team delivers both the technology, and the enablement needed to transform how your business accesses and uses data..

Key Benefits

- ◆ **Break Down Data Silos:** Consolidate fragmented data sources across departments, cloud, on-prem, and SaaS into a single, unified platform for improved accessibility and transparency.
- ◆ **Enable Trusted Insights:** Empower analysts and decision-makers with governed, accurate data they can trust — reducing risk and accelerating time to insight.
- ◆ **Support Regulatory Compliance:** Leverage automated data classification, lineage tracking, and access policies to stay aligned with HIPAA, GDPR, and other regulations.
- ◆ **Lay The Groundwork for AI:** A unified and governed data estate ensures your organization is prepared to adopt AI and machine learning responsibly and effectively.
- ◆ **Promote Self-Service and Agility:** Give business users the tools to explore and analyze data on their own, while IT retains governance and security control.

What ArchitectNow Will Deliver

◆ Strategic Planning & Data Estate Assessment

We begin with stakeholder workshops and a deep dive into your current data environment. We identify key data sources, pain points, compliance requirements, and business use cases. This phase concludes with a tailored roadmap outlining the phases of your unified data platform rollout.

◆ Deployment of Microsoft Fabric & Purview

ArchitectNow will set up your Microsoft Fabric environment (including OneLake, Data Factory, and Power BI) and deploy Microsoft Purview for data cataloging and governance. We ensure both platforms are aligned and configured for your unique needs.

◆ Data Ingestion & Source System Integration

Our team will connect to your existing data sources, including cloud databases, on-prem systems, SaaS apps, and file repositories. We'll build automated pipelines, and ingestion flows to bring your data into the unified Fabric architecture.

◆ Classification, Lineage, and Governance Policies

We'll configure data classification (built-in and custom), establish lineage tracking across your data flow, and apply data access and retention policies. These features support compliance and transparency at every level of your organization.

◆ Power BI Dashboards & Self-Service Discovery

ArchitectNow will help you create and connect BI dashboards to governed datasets. We'll also roll out Purview's data catalog to enable users to search, find, and request access to trusted data, reducing dependency on IT.

◆ Training & Enablement for Long-Term Success

We'll provide hands-on training for business users, data stewards, and administrators. You'll receive best practices documentation, governance playbooks, and live sessions to ensure adoption and scalability of the platform.

Why ArchitectNow?

ArchitectNow offers expert guidance and customized plans to meet your business goals. We provide impartial risk evaluations and mitigation strategies for IT decisions, ensuring informed choices for platforms, upgrades, or integrations. Our Professional Services enhance your organization's IT experiences, reduce risks, and optimize operations.

We are your committed partner for ongoing business success.
